Welcome to Web and Mobile Application

Courses

Module 1

Learning HTML & CSS is essential for anyone hoping to work as a Web Developer or a Front End Developer. Most people who learn HTML learn it as a foundation for learning more complex coding languages such as JavaScript or React.

Module 2

Learn to use **React** and **React Native** with **NodeJs** and **MongoDB API** to build applications for web and native mobile apps for Android devices, having emails, protested login system and SocketIo to make your application realtime.
